

Some details for preparing articles for our technical journal WELDING AND CUTTING

Please send text and figures as separate papers or files.

Specialist Articles

The text shouldn't be longer than 5 pages DIN A 4 (referring to courier 12 point or similar = 20,000 characters). Our articles are usually beginning with a short summary or abstract of three or four sentences, which gives an idea of the content and the results. The first chapter should give an introduction or tell the goal of the investigations. The last chapter should contain final remarks e. g. about the relevance for practice or further investigations to make. It should not be a summary. The article should be free of publicity content. Companies names or product names should only be used if needed for the understanding.

The number of figures and tables should be about seven. The figures can be coloured. If you send picture files, please choose tif-, bmp or jpg format (uncompressed) in 300 dpi.

Reports

The text shouldn't be longer than about 2½ pages DIN A 4 (referring to courier 12 point or similar = 10,000 characters). These articles are usually dealing with the application of joining and cutting. The article should be free of publicity content. Companies names or product names should only be used if needed for the understanding.

The number of figures and tables should be about three to seven. The figures can be coloured. If you send picture files, please choose tif-, bmp or jpg format (uncompressed) in 300 dpi.

From Companies

The text shouldn't be longer than about 1 page DIN A 4 (referring to courier 12 point or similar = 6,000 characters). These articles are usually dealing with the application of joining and cutting in relation to companies products and techniques. Companies names and product names can be used in the article.

The number of figures and tables should be about three. The figures can be coloured. If you send picture files, please choose tif-, bmp or jpg format (uncompressed) in 300 dpi.
